About Cloud School

The Cloud School from Arcitura provides formal education and accreditation programs dedicated to fields of practice associated with Cloud Computing, including technology architecture, security, governance and specialized areas of cloud technology.

The Cloud School curriculum is comprised of 18 course modules and 7 certification tracks. Exams are available worldwide via Pearson VUE testing centers, as well as via Pearson VUE OnVue online proctoring and on-site delivery by Certified Trainers. Achieving a passing grade on the required exam(s) achieves a certification for which a digital accreditation certificate is automatically issued by Arcitura and a digital certification badge is issued by Acclaim/Credly.

HOW TO TAKE THIS COURSE

ARCITURA ELEARNING OPTIONS

To give you the most flexibility to achieve your learning goals and accommodate your preferences, this course is made available via two Arcitura eLearning solutions: An interactive environment with graded exercises and a graded self-test, as well as a study kit account that supports online/offline access and custom annotations.

To learn more, visit: www.arcitura.com/elearning

To enroll, visit: digital.arcitura.com/courses

ONSITE WORKSHOPS

Private onsite workshops can be delivered by Certified Trainers from Arcitura and authorized training partners for both small and large groups. Each workshop participant can receive access to the full Arcitura Digital eLearning course materials. Each workshop agenda, format and schedule can be tailored to client requirements.

To learn more, visit: www.arcitura.com/workshops

VIRTUAL WORKSHOPS

Private virtual workshops can be delivered by Certified Trainers for small and large groups, as well as individual participants. Workshop participants receive access to the course materials via the Arcitura Digital eLearning platform. Virtual workshop agendas can be tailored with greater flexibility to accommodate more distributed and fragmented training schedules.

To learn more, visit: www.arcitura.com/workshops

Several additional learning and exam preparation products and services are available, including coaching, exam prep kits and digital downloads. See the Training and Exam Preparation Resources page for details.

HOW TO GET STARTED

Welcome to the Cloud Architecture course! This course is comprised of a set of modules. Each module has a set of lessons and is further supplemented with exercises to help reinforce your understanding of key topics. Upon completing the course, you can optionally proceed to prepare yourself for the certification exam (as explained on the *How to get Certified* page).

Additional resources are available to assist you with completing this course, including downloadable digital course files, printed course materials, coaching hours and instructor-led training services (as explained on the *Training and Exam Preparation Resources* page.)

PREREQUISITE

The prerequisite for this course is the completion of the Cloud Computing course. It is recommended that you complete the Cloud Computing course prior to starting the Cloud Architecture course.

MORE INFO

To enroll in this course, visit:
digital.arcitura.com/courses

HOW TO GET CERTIFIED

You can become a Certified Cloud Architect! This course can prepare you for the official Cloud Architect Certification exam, which can be taken worldwide at Pearson VUE testing centers, via Pearson VUE online proctoring and/or Arcitura direct proctoring.

Upon attaining a passing grade on the certification exam (and fulfilling any other prerequisite exam requirements) you will achieve the Cloud Architect Certification, after which you will automatically receive an official digital Accreditation Certificate and a digital Certification Badge from Acclaim/Credly with an account that supports the online verification of your certification status. Digital accreditation certificates and badges are free of charge.

Additional resources are available to assist you with preparing for the certification exam, including practice exam questions, downloadable digital course files, printed course materials, coaching hours and instructor-led training services (as explained on the *Training and Exam Preparation Resources* page.)

COURSE MODULE OUTLINES

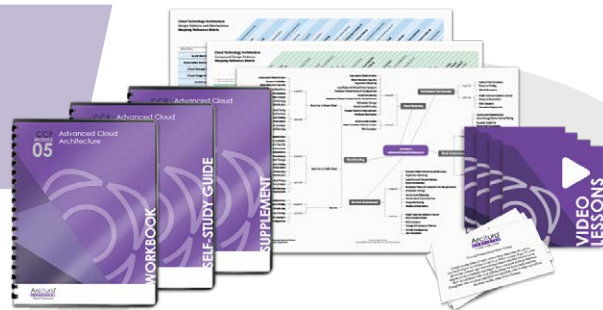

The Cloud Architecture course is comprised of the following course modules. Outlines for these course modules are provided on the subsequent pages.

Fundamental Cloud Architecture

Advanced Cloud Architecture

Cloud Architecture Lab

Fundamental Cloud Architecture

This course module provides a technical drill-down into the inner workings and mechanics of foundational cloud computing platforms. Private and public cloud environments are dissected into concrete, componentized building blocks (referred to as “patterns”) that individually represent platform feature-sets, functions and/or artifacts, and are collectively applied to establish distinct technology architecture layers.

Building upon these foundations, Software-as-a-Service (SaaS), Platform-as-a-Service (PaaS) and Infrastructure-as-a-Service (IaaS) environments are further explored as compound patterns, comprised of unique and shared building blocks.

The module is structured as a guided tour through these architectural layers, describing primary components, highlighting shared components, exploring containerization extensions and explaining how building blocks can be assembled and implemented via cloud computing mechanisms and practices.

The following primary topics are covered:

- Understanding the Technology Architecture of Private Clouds and Public Clouds
- Understanding the Technology Architecture of SaaS, PaaS and IaaS Environments
- Automated Administration and Centralized Remote Administration
- Container Sidecars and Container Chains
- Self-Provisioning and Platform Provisioning
- Rich Containers and Logical Pod Containers
- Bare-Metal Provisioning and Resource Management
- Single-Node Multi-Containers and Multipath Resource Access
- Usage Monitoring and Broad Access
- Realtime Resource Availability and Pay-as-You-Go
- Shared Resources and Resource Pooling
- Rapid Provisioning and Resource Reservation
- Non-Disruptive Service Relocation and Service State Management
- Workload Distribution and Dynamic Scalability

Advanced Cloud Architecture

//////

This course module builds upon CCP Module 4 to provide a deep dive into elastic, resilient, multitenant and containerized technology architectures, as well as specialized solution architectures, such as cloud bursting and cloud balancing.

Through the study of architectural mechanisms, industry technologies and design patterns, both core and extended components are described that combine to realize elasticity, resiliency, multitenancy and associated containerization extensions as primary characteristics of cloud platforms. By leveraging these native and enhanced scalability and failover-related feature-sets, specialized solution architectures are described to enable bursting between clouds and on-premise and cloud environments, as well as the balancing of runtime loads across clouds for performance and failover purposes.

The module organizes content so that architectural layers are explored sequentially and, where appropriate, in relation to each other. Newly introduced primary components are described and shared components across architectural layers are highlighted.

The following primary topics are covered:

- Understanding the Technology Architecture of Elastic, Resilient, Multitenant and Containerized Environments
- Elastic Resource Capacity and Elastic Network Capacity
- Multi-Container Isolation Control and Volatile Container Configuration
- Serverless Deployment and Elastic Disk Provisioning
- Leader Node Election and Micro Scatter-Gather
- Hypervisor Clustering and Redundant Storage
- Storage Service Gateway and Live Storage Migration
- LUN Storage and LUN Migration
- Dynamic Failure Detection and Recovery and Zero Downtime
- Service Load Balancing and Load Balanced Virtual Server Instances
- Load Balanced Virtual Switches and Persistent Virtual Network Configurations
- Dynamic Data Normalization and Synchronized Operating State
- Intra-Storage Device Vertical Tiering and Cross-Storage Device Vertical Tiering
- Storage Workload Management and Storage Maintenance Window
- Direct I/O Access and Direct LUN Access
- Redundant Physical Connection for Virtual Servers
- Cloud Bursting, including Burst In and Burst Out to Private/Public Clouds
- Cloud Balancing

Cloud Architecture Lab

This course module presents participants with a series of exercises and problems that are designed to test their ability to apply their knowledge of topics covered in previous modules. Completing this lab will help highlight areas that require further attention and will help prove proficiency in cloud computing design patterns, technology architecture layers, mechanisms, industry technologies and practices as they are applied and combined to solve real-world problems.

The following exercises are provided:

- Reading Exercise 6.1: Case Study Background XIT
- Lab Exercise 6.2: IaaS Environment Setup
- Lab Exercise 6.3: IaaS Architecture Customization
- Lab Exercise 6.4: Cloud Characteristics
- Reading Exercise 6.5: Case Study Background Sport Blips
- Lab Exercise 6.6: High-Performance Cloud Architecture
- Lab Exercise 6.7: Performance Optimization
- Lab Exercise 6.8: Cloud Characteristics
- Reading and Lab Exercise 6.9: High-Connectivity Cloud Architecture

TRAINING AND EXAM PREPARATION RESOURCES

You can supplement this course with a number of available resources to assist with both learning and exam preparation. Contact info@arcitura.com with any questions.

Certification Exam Prep Kit

A set of additional practice questions is available to support exam preparation.

Digital Course Files

For each course you can order a set of downloadable digital course materials comprised of printable, watermarked workbook and poster PDF files.

Printed Course Materials

The printed workbooks and posters for each course can be ordered in B&W and full-color, and can be shipped worldwide.

One-on-One Coaching

Certified Trainers are available to provide online coaching on an hourly basis and in all time zones.

Instructor-Led Training

Certified Trainers are available to provide virtual and onsite training workshops for this and other Arcitura courses.
